PDF/A-4
PDF/UA-2

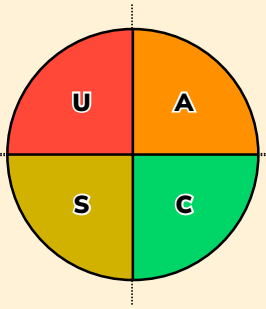

Validate that PDF!

1. **Drop a PDF onto the page**
2. **We analyze and verify it, for free**
3. **Share the results with anyone**

We check for...

Universal Accessibility
Check PDF/UA-1 and PDF/UA-2 compliance, browse the structure tree.

Archival Quality
Check PDF/A-1, A-2, A-3 and A-4 compliance.

Security
Verify digital signatures and timestamps.

Construction
Verify the file is valid, check for errors. Test against the Arlington Model.

What is this for?

PDF is more than just a document format; it's a container for digital signatures, attached files and more. This site lets you browse some of that data, often hidden in online PDF viewers.

This is a test PDF with some content to demonstrate the validator, including

- Digital signatures
- Bookmarks and actions
- Compliant with PDF/A-4
- Compliant with PDF/UA-2 (with rolemapping)
- Some file attachments
- Form Fields
- MathML
- Optional Content

MathML

We're a fan of MathML at BFO, and here's one of our favourite test equations; because it was one of the equations used to demonstrate the MathML rewrite in Chrome undertaken by Igalia between 2019-2023, we were able to compare our rendering to theirs at a pixel level - great for testing!
Open the PDF *structure tree* and you'll see this is properly tagged.

$$\Gamma(t) = \int_0^{+\infty} x^{t-1} e^{-x} dx = \frac{1}{t} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{n}\right)^t}{1 + \frac{t}{n}} \sim \sqrt{\frac{2\pi}{t}} \left(\frac{t}{e}\right)^t$$

Forms

Here's a simple dummy form with some fields.

Name Joe Bloggs

Rating ○ 1 ◉ 2 ○ 3 ○ 4 ○ 5

Address

Attached Files!

A PDF 1.7 version of the same file (compatible with PDF/UA-1 and PDF/A-3) is attached to this document, and as the MathML above includes an `<annotation encoding="TeX">` within it, the LaTeX source for that equation is attached to the Structure Tree as well.

Signatures!

No demonstration of what a PDF can do would be complete without some digital signatures.
